

Space Launch Delta 45 Prime Contractors Small Business Subcontracting Opportunities

Space Force Range Contract (SFRC)

Amentum Technology, Inc. (Large Business)

Randy Lycans, (256) 716-4649 / randy.lycans@us.amentum.com / Tullahoma, TN

The purpose of the Space Force Range Contract (SFRC) is to advance the national capability for Assured Access To Space (AATS) from the Eastern and Western Ranges through responsive and flexible operations, maintenance, sustainment, systems engineering and integration services

Digital Transformation, Acquisition, Modernization and Modification (DTAMM)

Science Applications International Corp. (SAIC) (Large Business)

Rocio Estrada (619) 881-1425 / Rocio.D.Estrada@saic.com / Reston, VA

DTAMM supports the modernization of Launch and Test Range Systems (LTRS) to meet mission requirements, provide range capabilities, and ensure the nation's ability to access space. Some of the projects under the DTAMM contract include cloud infrastructure, software factory and software development services and cyber security strategies.

Safety Hazard Analysis and Risk Processing System (SHARP II)

ARCTOS Technology Solutions, LLC (Small Business)

Fred Lacey (937) 559-6830 / fred.lacey@arctos-us.com / Beavercreek, OH

Provides the technical support required to augment and operationally implement the comprehensive safety program of the SLD 45 as it pertains to the use of Flight & Risk Analysis software models.

Pad Safety Support Contract (PSSC II)

Metis Technology Partners (MTP) (Joint Venture Protégé Small Business)

Joy Colucci, (505) 705-3065 / joy.colucci@metis-tech.com / Albuquerque, NM

Oversight of pad safety operations, including ordnance, liquid and solid propellants, cryogenics, radiological materials, high-pressure systems, critical handling equipment, launches

Instrumentation Radar Support Program (IRSP) III

BAE Systems Technology Solutions & Services Inc. (Large Business)

Michael Murphy / michael.b.murphy@baesystems.us / Katelyn Russell / katelyn.russell@baesystems.us / Rockville, MD

Logistics sustainment support to instrumentation tracking systems e.g. radar, telemetry, optics, flight termination systems, global positioning system, and data acquisition systems for test ranges worldwide to include warehousing, requisitions, fabrication, overhauls and engineering support

The Advancement of the Next-gen Operational Spaceports (THANOS)

OES-Pond JV II, LLC (8(a) – Tribal Owned Corporation)

Crystal Donaghue, J.D., (505) 379-4586 / cdonaghue@oescgoup.com / Milwaukee, WI

Provide services for program management, program development, program briefing, project management, engineering programming, environmental analysis, environmental compliance, engineering studies and review

Cape Launch Operations Infrastructure and Support III (CLOIS III)
